

I have heard that the FCC is considering LPFM that would overtake my favorite radio station of K-LOVE in our Colorado area. I am encouraged and calmed by the lovely music and words of K-LOVE both in my car in frantic traffic and at work in a busy office. I believe many people - thousands - in Colorado benefit from the same enjoyment of this donation supported radio station. We crave this station's positive messages and music.

I suspect this music broadcast plays in a lot of cars and homes and workplaces to make more productive and positive people in our community. Please do not over-ride their signal capability in Colorado or anywhere in the U.S.      THANK YOU!
